

SACRED GOLD & STORM SILVER

Pokémon Changes

This document exists as a reference guide to the changes made to Pokémon within Sacred Gold and Storm Silver. All changes (bar Evolutions, which have their own document) are listed in here, including changes to abilities, level-up moves, stats, types and others.

Notation is the following...

() = New,
{} = Replaces Original,
[] = Shifts from Original Position

In an ability context, if {} is used then it refers to which ability has been replaced by the new one, otherwise it's just an addition. For level-up moves, it is explanatory with the prior definitions.

Remember: Use Ctrl+F to find a Pokémon easily! If a Pokémon is missing from the document, then no changes have been applied to it.

Also an important note: the move relearner, together with the move deleter has been moved to the top left house in Cianwood City. There are also some changes to moves; Cut is a 60-power Grass move, Strength is a 60-power Rock move with a 10% chance of reducing the foe's Attack and Rock Smash is a 60-power Fighting move which now has a 30% chance of reducing Defense. All Black and White upgrades to moves have been added where possible, too.

Sacred Gold Plus 1.3.2 - current instructions follow. The historical introduction above is superseded by the current guide. Use Move Changes for current move values. Strength has 75 power.

Pokemon Changes

Sacred Gold Plus 1.3.2 - current English reference.

Differences from unmodified HeartGold, including inherited Sacred Gold and early Plus changes. All 493 species were checked. Only changed type, ability, base-stat and level-up entries are listed. Move definitions are covered separately in Move Changes.

Changes apply in both difficulties. Existing Pokemon keep their identity, IVs, EVs, moves and ability slot. Base-stat changes do not grant EVs or IVs.

001 Bulbasaur

+Abilities: Overgrow to Overgrow / Chlorophyll

+Level-Up Moves: Sludge added at Lv.17, Nature Power added at Lv.29, Power Whip added at Lv.43
